

Ergotron Neo-Flex™

Keyboard Wall Mount

Benefits

- Tray can be extended up to 5", placing the keyboard up to 16" from the wall.
- Folds up flat when not in use for low-profile storage—only 4.5" from wall.
- Mouse tray slides out to left or right, depending on user preference.
- Creates a complete digital imaging station when combined with the Neo-Flex Dual Monitor Wall Mount.

Reduce errors by entering data at the point of care. This low-profile solution easily folds up out of the way when not in use.
